and a variety of other languages*

Developing musical and language skills together,

Bringing other cultures to young people,

Widening their horizons of the world

A large part of the program is devoted to building a foundation for creativity, self-expression and allowing students to develop their fullest potential. Students will leave the class not only with knowledge of foreign language, culture, and music, but also with a feeling of personal accomplishment. Singing is a traditional European technique of developing accurate pronunciation in a foreign language. This method also helps students to learn language in natural contexts, which is the same way we learn our native language.

Students will participate in public performances. The students who are studying musical instruments will have an opportunity to accompany the singers for some of the songs and to perform solo parts.

Various levels and age groups (ages 6 & and up) Session cost: \$150.00 (Feb-May)
